INDEX TO VOLUME 15

A

Absorption Spectra of Liquid Benzene and Toluene (James Barnes and W. H. Fulweiler), 331.

Absorption Spectra of Mercury, Cadmium and Zinc at High Pressure (F. L. Mohler and H. R. Moore), 74.

Achromatic Doublet, the Color Correction of an (T. Townsend Smith), 247.

AIKEN, CHARLES BAYNE: The Alteration of Resistance, Inductance and Capacity by means of Resistance Coupled Amplifiers, 85.

Amorphous Solids, The Scattering of Light in (C. V. Raman), 185.

Amplifiers, Resistance Coupled (Charles Bayne Aiken), 85.

Artificial Daylight and Unmodified Gas-filled Tungsten Lamps, Note on the Relative Comfort in Reading by (Irwin G. Priest), 131.

B

BADGER, RICHARD M.: Two Devices Facilitating Spectrometry in the Far Infrared, 370.

BARNES, JAMES and W. H. FULWEILER: The Near Infrared Absorption Spectra of Liquid Benzene and Toluene, 331.

Bead Spectra (H. L. Howes and M. K. Slattery), 17.

Beam of Low-Velocity Electrons (H. E. Farnsworth), 290.

BISHOP, G. H. and A. S. GILSON: A Vibration-free Capillary Electrometer, 48.

BLAIR, HENRY A.: On an Integral Relation Between the Slopes of the Branches of Porter Graphs, 1.

Bridge as Harmonic Analyzer (Irving Wolff), 163.

BRONK, D. W., A. A. LEVIN, and C. F. MEYER: On the Infrared Absorption Spectra of Several Gases, 257.

C

CAMPBELL, G. C. and G. W. WILLARD: A Device to Draw Vacuum Tube Characteristic Curves Automatically, 53.

Capillary Electrometer (A. S. Gilson and G. H. Bishop), 48.

Cathode Ray Oscillograms, A Mechanical Harmonic Analyzer for (C. F. Wiebusch), 355.

CHAFFEE, E. L. and A. B. MESERVEY: Electrical Response of the Retina in Different Types of Cold-blooded Animals, 311.

Chart Showing Resistance of Wires (W. H. Stannard), 64.

CLAPP, J. K.: "Universal" Frequency Standardization from a Single Frequency Standard, 25.

Color Correction of an Achromatic Doublet II. (T. Townsend Smith), 247.

Color Mixer, A Compact (J. M. McGinnis and D. S. Piston), 117.

Coupled Amplifiers, (Charles Bayne Aiken), 85.

CROUP, ALFRED H. and WINTHROP R. WRIGHT: A Device for Studying Mechanical Resonance in the Elementary Laboratory, 178.

D

DAHM, THOS. M.: Organic Media as Spectral Filters in the Ultraviolet, 266.

Dilatometer Employing Automatic Photography, an Interferential (R. H. Sinden), 171.

DODD, L. E. and G. H. JUNG: A Continuously Variable Double Slit, 181.

E

Electrical Response of the Retina in Different Types of Cold-blooded Animals (A. B. Meservey and E. L. Chaffee), 311.

Electrolytic Preparation of Oxygen and of Ozone, Laboratory Apparatus for the (Oliver R. Wulf), 119.

Electrons, A Method of Obtaining an Intense Beam of Low-velocity (H. E. Farnsworth), 290

F

Far Infrared Spectrometry (Richard M. Badger), 370.

FARNSWORTH, H. E.: A Method of Obtaining an Intense Beam of Low-velocity Electrons, 290.

FOX, J. E., PAUL ROOD, and W. G. MARBURGER: A Laboratory Clock with Photoelectric Signal Control, with an Application to Timing a Pendulum by the Method of Coincidences, 364.

Frequency Standardization (J. K. Clapp), 25.

FRY, THORNTON C.: Plane waves of Light, 137.

FULWEILER, W. H. and JAMES BARNES: The Near Infrared Absorption Spectra of Liquid Benzene and Toluene, 331.

G

GEORGE, HARRY S.: Illumination in Metal Microscopy, 295.

GILSON, A. S. and G. H. BISHOP: A Vibration-free Capillary Electrometer, 48.

H

Halftone Negative Making, A Photoelectric Process of (Herbert E. Ives), 96.

Harmonic Analyzer, The Alternating Current Bridge as a (Irving Wolff), 163.

Harmonic Analyzer for Cathode Ray Oscillograms (C. F. Wiebusch), 355.
HEAPS, C. W.: The Photomagnetic Effect in Silver Chloride and in Selenium, 190.
Hot Wire Microphone, Some Properties of a (Orin Tugman), 110.
HOWES, H. L. and M. K. SLATTERY: On Bead Spectra, 17.

I

Illumination in Metal Microscopy (Harry S. George), 295.
Infrared Absorption Spectra of Liquid Benzene and Toluene (James Barnes and W. H. Fulweiler), 331.
Infrared Absorption Spectra of Several Gases (C. F. Meyer, D. W. Bronk, and A. A. Levin), 257.
Infrared Reflection Maxima, The Shift of with Temperature (A. H. Pfund), 69.
INGERSOLL, L. R., N. H. JOHNSON and C. E. MENDENHALL: A Radiation Method of Measuring Strain in Glass, 285.
Interferential Dilatometer Employing Automatic Photography (R. H. Sinden), 171.
Intermittency Effect in Photographic Exposure (Clarence E. Weinland), 337.
IVES, HERBERT E.: A Photoelectric Process of Halftone Negative Making Applicable over Telephone Lines, 96.
IVES, HERBERT E. and A. L. JOHNSRUD: The Thickness of Spontaneously Deposited Photoelectrically Active Rubidium Films, Measured Optically, 374.

J

JOHNSON, N. H., C. E. MENDENHALL, and L. R. INGERSOLL: A Radiation Method of Measuring Strain in Glass, 285.
JOHNSRUD, A. L. and HERBERT E. IVES: The thickness of Spontaneously Deposited Photoelectrically Active Rubidium Films, Measured Optically, 374.
JUNG, G. H. and L. E. DODD: A Continuously Variable Double Slit, 181.

K

KLEIN, ERNEST H. and MELVILLE F. PETERS: A Low Pressure Valve, 59.

L

LEVIN, A. A., C. F. MEYER, and D. W. BRONK: On the Infrared Absorption Spectra of several Gases, 257.
Light, Plane Waves of (Thornton C. Fry), 137.
Low Pressure Valve (Melville F. Peters and Ernest H. Klein), 59.

M

MARBURGER, W. G., F. E. FOX, and PAUL ROOD: A Laboratory Clock with Photoelectric Signal Control, with an Application to Timing a Pendulum by the Method of Coincidences, 364.
MARIS, H. B.: Photo-elastic Investigations of the Tensil Test Specimen, the Notched Bar, the Ship Propeller Strut, and the Roller Path Ring, 203.
Maris, H. B.: Photo-elastic Properties of Transparent Cubic Crystals, 194.
MCGINNIS, J. M. and D. S. PISTON: A Compact Color Mixer, 117.
Mechanical Resonator (Winthrop R. Wright and Alfred H. Croup), 178.
MELVIN, EUGENE H. and H. C. RAMSPERGER: The Preparation of Large Single Crystals, 359.
MENDENHALL, C. E. and C. L. UTTERBACK: The use of the Wire Method for the Melting Point of Palladium, 62.
MENDENHALL, C. E., L. R. INGERSOLL, and N. H. JOHNSON: A Radiation Method of Measuring Strain in Glass, 285.
MESERVEY, A. B. and E. L. CHAFFEE: Electrical Response of the Retina in Different Types of Cold-blooded Animals, 311.
MEYER, C. F., D. W. BRONK, and A. A. LEVIN: On the Infrared Absorption Spectra of Several Gases, 257.
Microphone, Some Properties of a Hot Wire (Orin Tugman), 110.
MILLER, C. D.: A Potentiometer Arrangement for the Measurement of EMF over a Wide Range, 238.
MOHLER, F. L. and H. R. MOORE: Absorption Spectra of Mercury, Cadmium and Zinc at High Pressure, 74.
MOORE, H. R. and F. L. MOHLER: Absorption Spectra of Mercury, Cadmium and Zinc at High Pressure, 74.

O

Organic Media as Spectral Filters in the Ultraviolet (Thos. M. Dahm), 266.
Oxygen and Ozone, Laboratory Apparatus for the Electrolytic Preparation of (Oliver R. Wulf), 119.

P

Palladium, Melting Point of (C. E. Mendenhall and C. L. Utterback), 62.
PETERS, MELVILLE F. and ERNEST H. KLEIN: A Low Pressure Valve, 59.
PFUND, A. H.: The Shift of Infrared Reflection Maxima with Temperature, 69.
Photo-Elastic Investigations of the Tensil Test Specimen, the Notched Bar, the Ship Propeller Strut, and the Roller Path Ring, (H. B. Maris), 203.
Photo-elastic Properties of Transparent Cubic Crystals (H. B. Maris), 194.
Photoelectric Process of Haftone Negative Making Applicable over Telephone Lines (Herbert E. Ives), 96.
Photoelectric Signal Control (J. E. Fox, Paul Rood, and W. G. Marburger), 364.
Photographic Exposure, the Intermittency Effect in (Clarence E. Weinland), 337.

Photomagnetic Effect in Silver Chloride and in Selenium, (C. W. Heaps), 190.
Photometric Sensibility as a Function of Wave Length at Low Brightness, Correction of a Prevalent Error in Regard to the Data on (Irwin G. Priest), 82.
PISTON, D. S., and J. M. MCGINNIS: A Compact Color Mixer, 117.
Plane Waves of Light, (Thornton C. Fry), 137.
Polarimeter for Demonstrating the Law of Malus (LeRoy D. Weld), 66.
Porter Graphs, on an Integral Relation between the Slopes of the Branches of (Henry A. Blair), 1.
Potentiometer Arrangement for the Measurement of EMF over a Wide Range (C. D. Miller), 238.
PRIEST, IRWIN G.: Correction of a Prevalent Error in Regard to the Data on Photometric Sensibility as a Function of Wave Length at Low Brightness, 82.
PRIEST, IRWIN G.: Note on the Relative Comfort in Reading by Artificial Daylight and Unmodified Gas-Filled Tungsten Lamps, 131.

R

RAMAN, C. V.: The Scattering of Light in Amorphous Solids, 185.
RAMSPERGER, H. C. and EUGENE H. MELVIN: The Preparation of Large Single Crystals, 359.
Reading by Artificial Daylight (Irwin G. Priest), 131.
Retinal Response (A. B. Meservey and E. L. Chaffee), 311.
REVIEWS:
BUCKLEY, H.: A Short History of Physics, 309.
CLARK, GEORGE L.: Applied X-rays, 184.
DUNOYER, L.: Vacuum Practice, 65.
EDDINGTON, A. S.: Stars and Atoms, 116.
HOAR, ROGER SHERMAN: Patents, 68.
HOWELL, JOHN W. and HENRY SCHROEDER: History of the Incandescent Lamp, 382.
International Critical Tables of Numerical Data, Physics, Chemistry and Technology, Vol. II, 161.
KEMBLE, E. C., R. T. BIRGE, W. F. COLBY, F. W. LOOMIS, and L. PAGE: Molecular Spectra in Gases, 201.

TURNER, D. M.: Makers of Science: Electricity and Magnetism, 58.
ROOD, PAUL, J. E. FOX, and W. G. MARBURGER: A Laboratory Clock with Photoelectric Signal Control, with an Application to Timing a Pendulum by the Method of Coincidences, 364.
Rubidium Films, the Thickness of Spontaneously Deposited Photoelectrically Active (Herbert E. Ives, and A. L. Johnsrud), 374.

S

SAWYER, RALPH A.: A New one Meter Vacuum Spectrograph Design, 305.
Scattering of Light in Amorphous Solids (C. V. Raman), 185.
Shift of Infrared Reflection Maxima with Temperature (A. H. Pfund), 69.
SILBERSTEIN, LUDWIK: The Transparency of Turbid Media, 125.
SINDEN, R. H.: An Interferential Dilatometer Employing Automatic Photography, 171.
Single Crystals (H. C. Ramsperger and Eugene H. Melvin), 359.
SKELLETT, A. M.: A Hot Wire Vacuum Gauge, 56.
SLATTERY, M. K. and H. L. HOWES: On Bead Spectra, 17.
Slit, A Continuously Variable Double (L. E. Dodd and J. H. Jung), 181.
Slope Relations in Porter Graphs (Henry A. Blair), 1.
SMITH, T. TOWNSEND: The Color Correction of an Achromatic Doublet. II, 247.
Spectral Filters in the Ultraviolet, Organic Media as (Thos. M. Dahm), 266.
Spectrograph Design, A New One Meter Vacuum (Ralph A. Sawyer), 305.
Spectrometry, Far Infrared (Richard M. Badger), 370.
STANNARD, W. H.: A Convenient Chart Showing Resistance of Wires, 64.
Strain in Glass, A Radiation Method of Measuring (C. E. Mendenhall, L. R. Ingersoll, and J. H. Johnson), 285.

T

Thickness of Rubidium Films (Herbert E. Ives and A. L. Johnsrud), 374.
Transparency of Turbid Media (Ludwik Silberstein), 125.
Transparent Cubic Crystals, Photo-elastic Properties of (H. B. Maris), 194.
TUGMAN, ORIN: Some Properties of a Hot Wire Microphone, 110.
Turbid Media, The Transparency of (Ludwik Silberstein), 125.

U

"Universal" Frequency Standardization from a Single Frequency Standard (J. K. Clapp), 25.
UTTERBACK, C. L. and C. E. MENDENHALL: The use of the Wire Method for the Melting Point of Palladium, 62.

V

Vacuum Gauge, A Hot Wire (A. M. Skellett), 56.

Vacuum Spectrograph Design (Ralph A. Sawyer), 305.
Vacuum Tube Characteristic Curves, A Device to Draw (G. C. Campbell and G. W. Willard), 53.
Variable Double Slit (L. E. Dodd and G. H. Jung), 181.
Vibration-free Capillary Electrometer (A. S. Gilson and G. H. Bishop), 48.

W

WEINLAND, CLARENCE E.: The Intermittency Effect in Photographic Exposure, 337.
WELD, LEROY D.: A Polarimeter for Demonstrating the Law of Malus, 66.
WIEBUSCH, C. F.: A Mechanical Harmonic Analyzer for Cathode Ray Oscillograms, 355.
WILLARD, G. W. and G. C. CAMPBELL: A Device to Draw Vacuum Tube Characteristic Curves Automatically, 53.
WOLFF, IRVING: The Alternating Current Bridge as a Harmonic Analyzer, 163.
WRIGHT, WINTHROP R. and ALFRED H. CROUP: A Device for Studying Mechanical Resonance in the Elementary Laboratory, 178.
WULF, OLIVER R.: Laboratory Apparatus for the Electrolytic Preparation of Oxygen and of Ozone, 119.
